Monier® Nordica®, A New Inspiration for Malaysian Roofscape

Monier® NORDICA® Roof System brings a totally new roofscape to Malaysia with its rounded wave design - an inspiration from the Nordic and Baltic regions. While Round Tech on NORDICA® gives your roof a precise rounded nose edge that also retards fungus growth, it has now become the new roofing reference and trend in the building industry that is well accepted by nation builders for major housing schemes, schools and public buildings.

TRENDY ROUND WAVE DESIGN

This roof style with its simple yet distinctive features complement your modern homes architecture, giving it an overall refreshing look.

EASY INSTALLATION

Moulded with precision and uniformity to ensure dimension stability for a consistent and perfect fit each time. Tiles can be laid cross-bond and straight-bond.

COMPACT ROUND NOSE

The unique round nose, improves ageing by delaying fungus and algae growth at the nose of the tile. This feature is well-matched and suitable for Malaysian weather.

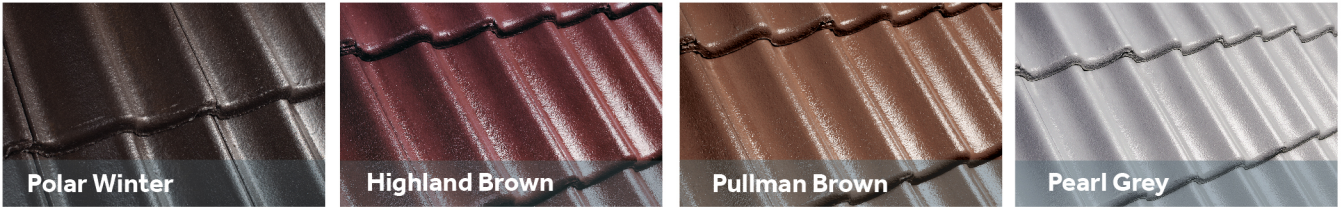

CHESSBOARD EFFECT

Chessboard colours are MONIER's latest innovation offering for unique roof styles. The Chessboard effect looks even more outstanding when laid cross-bond.

NORDICA® COLOUR PALETTE

With a palette that is inspired by the natural cool colours of simple and unique Nordic lifestyle, our Nordica® Roof System range of colours will enliven your roof styles.

*The colours shown here are reproduced as close to the original as printing technology allows. For best accuracy on colour selection, refer to actual tile.
**Other colours not featured on this page are available upon request.

PRODUCT & TECHNICAL DATA		
Dimension (W) x (L)	330mm x 420mm	
Batten Spacing*	295mm - 345mm	
Headlap	75mm - 125mm	
Coverage	9.7pcs/m ² (based on 75mm headlap)	
Weight	Weight/piece	4.25kg (+0.0, -0.30)
	Weight/m ²	41.2kg/m ² (+0.0, -2.9kg/m ²)
Minimum Pitch	17.5°	

* The maximum rafter inclined length (total water run-off distance) is up to 6 meters at the minimum roof pitch stated. For rafter lengths exceeding this limit, please consult Monier for technical advice.

* The overall truss layout shall be set out equally and maintained consistently to ensure compliance with the recommended batten spacing specified in the installation requirements.

* For multi-tier roof configurations, a properly designed rainwater gutter system shall be provided between the upper and lower roof tiers to ensure effective drainage, provide controlled runoff, minimize splash, and protect the lower roof from potential leakage or damage caused by uncontrolled flow during heavy rainfall. We shall not be held liable for any water-related issues arising from the absence of a gutter system in a multi-tier roof design. Rainwater from downpipes, gutters, and valley gutters shall not be discharged onto the lower tiled roof to avoid excessive water concentration.

In view of innovation, the specifications are subject to change without any prior notice and in the event of such changes, Monier shall ensure that the new specifications are equivalent if not better.
